Live Timing & Online results.

timeservice.nl

GET YOUR
TRACK ONLINE

Reach more people and engage drivers, spectators, the press and the fans for the long-term. Give them a reason to be excited about following the races, wherever they are, by giving them online access to all timing information including race results, live timing and a spectacular Race position Tracker.

- **Real-time Live Timing without delays on phones, tablet or laptop**
- **Fans can follow the event on the circuit or at home.**
- **Easily upload race results to the website.**
- **Extensive amount of live timing layouts available.**

PROMOTE YOUR
EVENTS ONLINE

In the world of motorsports profiling your track online is a must. Racers and race fans ask for online services to follow the (race) events. Built a commitment to your track and the events by letting the people follow the race, no matter where they are.

Modern online solutions as real-time live timing and online race results engage the people at the circuit and the fans at home. With these services you can engage a broader public than ever before.

LIVE TIMING AND RACE TRACKER

With the Live Timing and Race tracker everybody connected to internet can follow the race no matter where they are. The race director, drivers, commentators, press and the fans will be ecstatic with the extensive amount of timing information in the Live Timing.

Combined with the Tracker the real racing action on the track comes to live. The Race Tracker animates the position of the cars on the track. Even when you cannot see the action, you know what is happening. The tracker are your eyes on the track.

ONLINE RACE RESULTS

Easily upload an impressive amount of timing information to the website. The RSTime timekeeping system holds many interesting timing information which can be extracted from the system in clear and useful race reports. The timekeeper generates these reports (results, lap times, etc.) from the system and uploads them to the website with one push of a button. Take a look at www.raceresults.nu/results for an example of event results

- Results and results per class
- Start grid
- Lap– and sector times
- Lap- and position charts
- Heat statistics
- Endurance reports
